FROM :  
SUBJECT : Guard Hardware Status

STAT

As of Friday, June 22, all of the Guard project's hardware, documentation, and spares have been disconnected and moved to the equipment staging area in the [ ] Computer Center in Headquarters Building. The original space this equipment occupied is now available for installation of the new communications equipment as requested by ODP.

STAT

With the equipment in its present location, it may be either removed to our [ ] offices or reinstalled in a new location as required. Moving it out of the Headquarters Building may require up to two weeks advance notification in order to obtain the type of truck required, however with the current location this will present no problems to the planned upgrades in the RCC.
